Midterm Project - COVID-19 Data Analysis

Xinyi Liu

Mon Feb 28 22:28:31 2022

Introduction

For this project, I will analyze COVID-19 data from the COVID tracking project https://covidtracking.com/. The COVID tracking project collected state-level metrics for COVID-19 cases, tests, hospitalizations, and outcomes from 2020/01/13 to 2021/03/07. Besides that, I will also use the COVID-19 Vaccinations data in the United States from Centers for Disease Contol and Prevention https://data.cdc.gov/Vaccinations/COVID-19-Vaccinations-in-the-United-States-Jurisdi/unsk-b7fc. The primary question I will investigate with these data is whether the number and the trend of confirmed cases differs from state to state, and what may be the reason.
